# (NC) DIRECT ACTING BRASS SOLENOID VALVE

## EV 1142

**Tecofi'**  
VALVE DESIGNER - FRANCE

### APPLICATION

General use : fluid network such as water, air, neutral gases, steam and fuel oil.

### GENERAL CHARACTERISTICS

range : from DN 1/4" to DN 1/2"

Direct acting 2/2 solenoid.

Normally closed.

Standard tightness FPM.

### Voltage:

Alternative (12 - 24 - 48 - 110 - 230 - 400 V)

Frequency (50Hz - 60Hz)

Direct current (12 - 24 - 48 - 110 V)

### CONSTRUCTION

9	Nut	Zinc plated steel
8	Washer	Zinc plated steel
7	Coil	PBT + 30% glass fiber
6	Guiding tube	Stainless steel AISI 430
5	Spring	Stainless steel AISI 430
4	Movable core	Stainless steel AISI 303
3	Support	Stainless steel
2	Seal	FPM
1	Body	Brass EN CW 617 N
Pos.	Description	Material

Mounting on horizontal pipe

### DIMENSIONS

DN		A	B	C	D	weight (kg)
mm	inch					
10	1/4"	42	69	60	60	0,4
12	3/8"	47	73	60	62	0,45
15	1/2"	56	76	60	63	0,5

### WORKING CONDITIONS

Maximum working pressure :

**AC power:**

DN 1/4" - 3/8" :15 bar.

DN1/2": 5 bar

**DC power:**

DN 1/4" - 3/8" :7 bar.

DN1/2": 3 bar

Maximum temperature : + 150°C.

Ambient temperature : -10°C / +80°C

**Note:** The maximum differential pressure can be reduced in DC current whether the temperature is above 40°C

### STANDARDS

BSP threaded connection according to ISO 228.

Coil class F. 100% service.

Connection by the mean of connector T30.

### Head losses diagrams
