

**Tecofi**   
VALVE MANUFACTURER - FRANCE

Our environmental   
**Commitment**

# OUR ECO-CHAINE

1

## Responsible Production

Decreasing our consumption by **90%** by limiting our pneumatic compressor use and using more energy efficient tools at our Corbas production site (eastern Lyon).

**Recyclable metal material** can be endlessly melted down and repurposed.

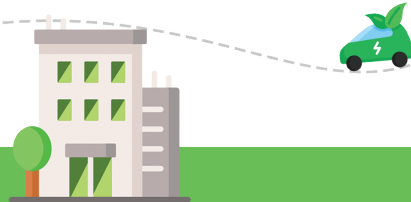

Decreasing our gas consumption for heating our Corbas warehouse by **66.8%** in line with the French 'Decrets Tertiaire' and BACS.

## Our efforts in the office

**54%** less paper used over the past five years.

Power consumption reduced by **60%** in our offices thanks to LED lights.

2

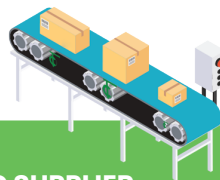

Our servers were relocated to a data center to lower power consumption.  
Hybrid or 100% electric vehicle fleet.

3

## Local & Recyclable Packaging

### REGIONAL PACKAGING SUPPLIER

- ✓ Eco-design
- ✓ Locally sourced raw materials
- ✓ Using 100% recycled cardboard
- ✓ Ecovadis Gold

**46%** less wood waste in 4 years through improved packaging (saving 30 tonnes of wood).

**92%** of our waste is recycled, saving energy and water.

## Verified Transport

Selecting **ISO 14001** certified freight forwarding agents. Fleet of next-generation engine lorries producing less pollution

4

Significant increase in **rail freight** reducing our environmental impact.

## Our Promise

### Protect natural water resources...

All of our valves are **100% watertight!**

Our valves and fittings are subjected to hydraulic tests under EN 12266-1, a standard that guarantees complete watertightness. Reducing leaks in water distribution networks plays an active role in protecting this resource!

### ...and help you use less energy!

Our valves have reduced operating torques to allow for smaller motors, reducing the investment cost and useful energy required

## TECOFI is committed to our CSR policy!

"In order to reinforce our commitment to controlled, responsible production and comply with sustainable organisation, environmental, ethical and human resource requirements, we decided to take the next step and undergo a CSR assessment by our partner, Ecovadis. We achieved an encouraging bronze medal in our first year. Our next goal: improving our score!"

## We chose HQE-certified offices!

The recently-created everEst Parc business park was designed to offer an improved quality of life! Holding HQE (High Environmental Quality) certification, it illustrates the use of sustainable planning and layouts that tick all the sustainability boxes in terms of the environment and infrastructure!

### Cup-free zone

Plastic and paper cups for our coffee machines and water fountains have been completely replaced by Tecofi mugs and glass bottles given out by the management team.

### Paper-free zone

We are reducing our printing and our paper consumption by organising in-house "paper-free zone" challenges for Tecofi employees.

*Every bit counts so we are committed every day!*

### Car-sharing

Many of our employees regularly car-share and in addition to this we organise a group challenge every quarter to make our teams more aware of this option. Every bit counts!

### Our beehives with Abeilles Environnement

We help to protect biodiversity by installing beehives on our Tecofi sites in partnership with Api'Culture.

## We believe in access to safe water for everyone!

We are collaborating with Hydraulique Sans Frontières, an international organisation specialising in water and sanitation. Our mission involves delivering technical training on industrial plumbing fixtures and supplying Tecofi valves and fittings

We minimise our consumption of various resources, including by using testbeds with closed water circuits and by reusing packaging and materials.

**ALMOST ALL OF OUR VALVES ARE RECYCLABLE!**

**OVER 90% OF OUR PRODUCTION WASTE IS RECYCLED**

**WE HOLD ISO 9001/14001 CERTIFICATION AS A PLUMBING FIXTURE MANUFACTURER**

We have held ISO 9001 certification for over 20 years. This international certification confirms that we offer optimal quality management so that our clients can receive the best possible service. In addition to this acknowledgement of our management efforts, we have also achieved ISO 14001 certification for our environmental protection efforts.

**FRANÇAIS Know-how**

Tecofi is a member of the French Fab movement, helping to raise the profile of French industry internationally.

We are partners with

**La Région**  
Auvergne-Rhône-Alpes

&

**Perl.**

POTENTIAL ENTERPRISE TO REAL LEADER  
*Regional Perles companies are characterised by their dynamic nature, international presence and desire to invest*

## Exigences Environnementales Fournisseurs

### Charte Environnementale

TECOFI cherche à travailler avec des fournisseurs qui partagent les mêmes objectifs et utilisent les meilleures pratiques environnementales incluant la recherche d'efficacité énergétique, la réduction des déchets et le recyclage.

#### EXIGENCE 1 : CONCEPTION ET FABRICATION

Le Fournisseur doit être en mesure de démontrer les activités de conception qui permettent la réduction de l'impact environnemental de ses produits et services tout au long de leur cycle de vie, en tenant compte de facteurs tels que consommation d'énergie, utilisation des matériaux et traitement en fin de vie.

Le Fournisseur doit être en mesure de démontrer des pratiques de fabrication respectueuses de l'environnement.

Le Fournisseur doit se conformer aux exigences énoncées dans les listes de substances interdites et réglementées (REACH...).

#### EXIGENCE 2 : DECHETS ET EMISSIONS

Le fournisseur doit minimiser sa production de déchets solides, d'eaux usées et d'émissions atmosphériques pour limiter la pollution de l'air, de l'eau et des sols.

Le fournisseur doit également veiller à minimiser ses émissions de gaz à effet de serre.

#### EXIGENCE 3 : TRANSPORT

Le Fournisseur est tenu de réduire l'impact environnemental du transport en utilisant les transports de surface (routier, maritime ou ferroviaire) chaque fois que possible.

Le Fournisseur est tenu d'utiliser des véhicules éconergétiques lors du transport de marchandises ou de la prestation de services pour TECOFI.

Le Fournisseur doit être prêt à fournir des informations sur les aspects environnementaux du transport de marchandises à TECOFI, par exemple mode de transport, matériau d'emballage et sites de production.

#### EXIGENCE 4 : SECURITE

TECOFI vise le zéro accident.

Le Fournisseur doit identifier et éliminer toute situation dangereuse de travail.

Le Fournisseur doit mettre en place toutes les mesures préventives (formation, EPI, modes opératoires...) pour prévenir les accidents du travail et les maladies professionnelles.

#### EXIGENCE 5 : LE RESPECT DE L'ENVIRONNEMENT

Le Fournisseur s'engage à disposer d'une organisation environnementale adaptée à son activité lui permettant de maîtriser et de diminuer les impacts environnementaux négatifs de ses activités, produits et services.

Le Fournisseur s'efforce à protéger l'Environnement et à porter un effort particulier sur la réduction de son empreinte carbone liée à son activité.

Fabien FAYARD  
Directeur Général
