

# ECO-FRIENDLY SOLUTION

TECOFI offers the most flexible solutions with the maximum amount of control. The wind and solar power supply system caters to energy needs on isolated sites.

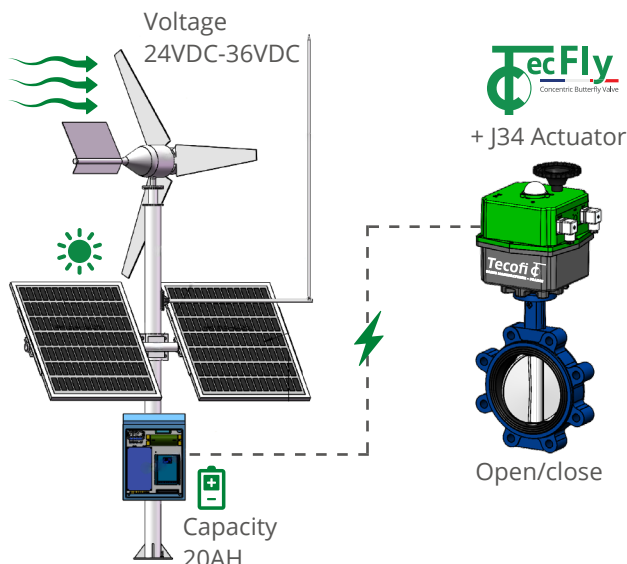

## SELF-SUFFICIENT AND REMOTELY CONTROLLABLE SOLUTION

- For sites without any access to the electrical grid
- For equipment powered and controlled remotely
- Feedback information to the operator

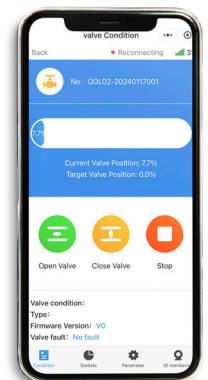

**CUSTOM-MADE PROJECT**  
We can help you find the right solution according to your installations!

### **ADVANTAGES**

- ✓ Ideal for a remote installation
- ✓ Fully integrated power supply is an investment that offers significant savings (no cable pulling or trenches)
- ✓ Remote control possible
- ✓ Remote monitoring of the battery
- ✓ Independent network and energy autonomy
- ✓ Energy saving
- ✓ Easy and fast to install
- ✓ Minimal environmental impact during installation
- ✓ No energy require, for a reliable installation in ecologically sensitive areas
- ✓ Limited maintenance (simply remove dust from the solar panel)
- ✓ French design and assembly with renowned equipment

The wind turbine and solar panel(s) convert wind and sunlight into electrical energy. This energy is stored in a battery. It is therefore possible to control the valve remotely from your phone. An optimal and ecological solution!

Control panel with your phone
