

Requirements Environmental Suppliers

Environment Chart

TECOFI tries to work with suppliers who share the same objectives and use the environmental best practices including the search for energy efficiency, reduction of waste and recycling.

REQUIREMENT 1: DESIGN AND PRODUCTION

The Supplier has to be capable of demonstrating the activities of design which allow the reduction of the environmental impact of its products and services throughout their life cycle, by taking into account factors such as energy consumption, use of materials and treatment at the end of life.

The Supplier has to be capable of demonstrating environment-friendly practices of manufacturing.

The Supplier has to conform to the requirements expressed in the lists of substances forbidden and regulated (REACH...).

REQUIREMENT 2: WASTE AND EMISSIONS

The supplier has to minimize his production of solid waste, waste water and air emissions to limit the pollution of air, water and grounds.

The supplier also has to watch to minimize his greenhouse gas emissions.

REQUIREMENT 3: TRANSPORT

The Supplier has to reduce the environmental impact of the transport by using the transport of surface (road, maritime or railroad) every time is possible.

The Supplier has to use vehicles consuming less energy during the transportation of goods or TECOFI services.

The Supplier must be ready to supply information on the environmental aspects of the transportation of goods to TECOFI, for example mode of transport, packaging material and production sites.

REQUIREMENT 4: SAFETY

TECOFI aims at the zero accident.

The Supplier has to identify and eliminate any dangerous working situation.

The Supplier has to set up all the precautionary measures (training, EAR, modus operandi) to prevent accidents at work and professional diseases.

REQUIREMENT 5: RESPECT OF ENVIRONMENT

The Supplier undertakes to have an environmental organization adapted to his activity allowing him to master and to decrease the negative environmental impacts of his activities, products and services.

The Supplier tries hard to protect the Environment and to concern a particular effort the reduction of his carbon footprint bound to his activity.
